## DETAILED ACTION

### *Claim Objections*

1. Claims 37 and 73 are objected to because of the following informalities:

In claim 1, at line 9, "the distal end" should be replaced with --the distal portion-- to provide adequate antecedent basis for the term.

In claim 73, at line 1, "the fastening structures are" should be replaced with --the fastening structure is-- to provide adequate antecedent basis and number agreement.

Appropriate correction is required.

### *Terminal Disclaimer*

2. The terminal disclaimer filed on 07 October 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 6,589,195 has been reviewed and is NOT accepted.

3. The application/patent being disclaimed has been improperly identified since the number used to identify the patent being disclaimed is incorrect. The correct number is U.S. Patent Number 6,589,195 wherein the Terminal Disclaimer lists U.S. Patent Number 6,589,824, which is not assigned to Applicant.

### *Double Patenting*

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686

Art Unit: 3743

F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 37-40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6-9 of U.S. Patent No. 6,589,195.

Although the conflicting claims are not identical, they are not patentably distinct from each other because '195 recites at least all of the instantly claimed subject matter, except '195 does not recite newly added functional language. This functional language is inherently embodied in the claims of U.S. Patent Number 6,589,195, which includes all of the structural elements of the claim, and to clearly elucidate such functional language in the claims would have been an obvious to one skilled in the art at the time the invention was made.

#### ***Allowable Subject Matter***

6. Claims 71-74 are allowed, per the correction of claim 73 as discussed above.

7. Claims 41-42 and 67-70 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Conclusion*

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
